

USING A VIRTUAL RING SIZER

TO CHOOSE YOUR RING SIZE

HOW TO USE:

- Print this ring sizer or, for a more eco-friendly option, simply use it on your computer screen. **Check that the 10cm marker actually measures 10cm on your screen or sheet of paper.** Before printing, ensure that the page scaling is set to "None" in the print dialog box.
- Place one of your rings on the different circles below to determine your finger size.
- Move your ring until you find the corresponding inner diameter. When the inner diameter of your ring matches the inner diameter of a circle exactly, you have found the right finger size for you.

10 cm
